

FLOOR MASK®

Self Adhesive Hard Surface Protection

PROTECTS HARD SURFACES QUICKLY AND EASILY!

Floor Mask® is a self adhesive liner low density polyethylene film that is designed to provide temporary surface protection for hard surfaces. We do NOT recommend using **Floor Mask®** on finished hardwood floors. The specially formulated adhesive system is designed to stick well and stay in place on a hard surface and then peel clean. The 3 Mil. plastic film thickness provides a durable shield which prevents damage to the protected surface. Use this product during construction, plastering, painting, remodeling, renovations, and repairs. Ideal for use on linoleum, ceramic tile, glass, bathtubs, cultured marble, counter tops and other hard surfaces. Simply roll it out and it stays where you put it for a durable long lasting protection. When you're done, **Floor Mask®** is easily removed. The maximum recommended application time is 45 days.

Floor Mask Specifications:

- 3 Mil. Thick, 3 Mil. Tough.
- 24", 30", 36", and 48" Widths.
- Tear Resistant.
- Solvent Acrylic Adhesive Technology.
- Reverse Wound For Easy Roll Out.
