

QuietRock[®]

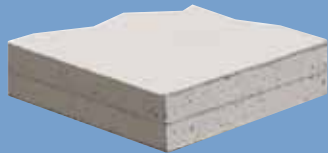

Soundproof Drywall

The Quiet Soundproofing System in 3 easy steps:

- The lowest cost soundproofing solution
- Hangs and finishes like standard drywall
- Reduces noise 70% or more
- Proven in 50,000 projects
- UL/ULC Classified for Fire Resistance - Type X*

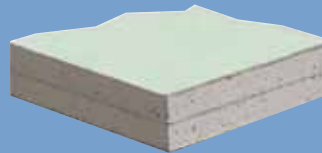

The top selling soundproofing drywall in North America continues to save builders money and exceed expectations in ease of use, reliability and proven results in over 50,000 projects. QuietRock replaces older techniques such as resilient channels, clips, sound board and mass loaded vinyl and offers lower cost solutions than other methods with higher STC performance.

QuietRock ES*

Delivers true score and snap with EZ-SNAP technology

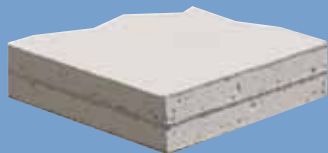

Thickness 15.9 mm (5/8")
System STC Range 48 - 55
